## The Juridical Current Journal

From the very beginning, the scientific journal has aimed to publish national and international law related articles and jurisprudence analyses, to facilitate the understanding of the European institutional systems and their decisions, and to provide information about the European litigations and the major problems raised by our country's integration.

Our journal has collaboration with authors from various countries of the world, including notable contributions from Romanian professors, law practitioners, as well PhD students. Our aim is not only to approach novelty in the classical domains but also to reveal the interdisciplinary relations between law disciplines and other domains (medical law, legal statistics, nutrition law, juridical management, management of public administration, industrial relations, criminal business law, European taxation, etc.).

Our journal aims to become a forum for debates on theoretical issues, to become a support for law practitioners and to stimulate research on a regional, national and international level.

This journal provides open access to its content, based on the principle that makes research freely available to the public, supporting a greater global exchange of knowledge.

The "Juridical Current" journal has been published quarterly since 1997 in printed and online version in Romanian, English and French.
